Anastasia Kozluk

Software Engineer

Hi there! I'm an autodidact front-end developer based in Warsaw. Passionate about crafting seamless user experiences, I specialize in building dynamic and responsive web applications using the powerful combination of React and TypeScript. With a keen eye for design and a commitment to code quality, I bring innovation to life in the digital realm.

Employment History

Frontend developer at DatHuis, Amsterdam

APRIL 2021 — PRESENT

DatHuis creates a marketing automation platform for the Realestate market. As a part of a **multidisciplinaire team** I was mostly responsible for contributing to **all facets of the frontend**. Including lead generation apps, the website widget and the core platform. At DatHuis we utilised **continuous integration** and **continuous delivery** paradigms which meant that all code should have good coverage according to our **testing pyramid**. This pyramid includes unit testing in Jest, e2e testing using Cypress, and smoke testing via Storybook. During my time we've also migrated our entire e2e testing over to Playwright of which I was a key component. I learned the most from the **peer review culture** we used at DatHuis, being able to iterate over small changes with a 4 eyes rule is very valuable in my opinion.

Additionally:

- I was responsible for the **research and creation of the custom Cookie banner** and alignment with the GDPR laws, Google Consent Mode and privacy features overall.
- Considering my experience, I had a chance to deliver some **designs using Figma** and implement them later on.

Frontend Developer at Freelance

OCTOBER 2020 — APRIL 2021

- Creating responsive design and cross browser compatible websites using HTML/CSS/Javascript.
- Collaborating with designers and developers using Git, Trello, Figma.
- Creating web applications based on design using React, TypeScript.

UX/UI and Graphic Designer at Freelance

FEBRUARY 2019 — OCTOBER 2020

- Identifying and qualifying customer needs and negotiating and closing profitable projects with high success rate.
- Keeping in constant contact with existing clients, organizing work with them.
